

DYNAMICPRO

Emergency Lighting Solutions

Product Catalogue V1.2

LEADING INNOVATION IN LIFE SAFETY

DynamicPro is a Canadian company specializing in providing integrated technologies in life safety and advanced building management solutions.

Our goals are focussed on enhancing our customer's satisfaction, experience and safety. These are delivered from our headquarters in Canada by our innovative team, in cooperation with VELOX Life Safety. Our state-of-the-art integrated technologies embedded within the proven VELOX CLOUD ecosystem deliver global life safety solutions that are second-to-none.

DynamicPro's expertise is built on more than 15 years of market and product technology expertise to deliver resilient DALI Emergency Light technology with a proven track record of projects worldwide.

The cooperation between the DynamicPro and VELOX in the IoT and CLOUD space delivers unparalleled user friendly integrated solutions using the proven Velox Cloud platform. This delivers a dynamic, integrated & scalable platform for the first time in the life safety industry.

IMPERIA MASTER PANEL

Smart Emergency Master Panel

MODEL : IM-6800

IMPERIA Master Panel is designed and tested to comply with the DALI standards EN 62386 (VO and V1), for DALI emergency lighting components.

FEATURUES

- IMPERIA master panel monitors all fittings connected to it using the DALI protocol, and monitors the following parameters of each light fitting as well as the circuit integrity of the network.
- Each light fitting is given a unique address for identification
- Control circuitry within each light fitting
- Charging rate
- Discharge current of the battery
- Battery status and output terminal voltage
- Battery capacity to ensure compliance to the rated standby time
- Checks internal resistance of the battery to manufacturer's specification
- Lamp lux levels and failure monitoring
- Input supply for overvoltage and undervoltage is monitored
- Circuit integrity of the networking cables

IMPERIA operates without a need for permanent connection to a PC or network. The controller is designed to make use of intuitive controls, allowing simple control and change to its attached DALI networks. Reports may be viewed on the screen, displayed directly. Alternatively, the reports can be uploaded to the IMPERIA sever.

IMPERIA is designed to control and monitor Class 1 DALI EXIT & Emergency Fittings ONLY. It does not have support for any other class of DALI component. The firmware of IMPERIA is upgradeable via USB or IMPERIA server

CABLE REQUIREMENTS

IMPERIA Master Panel is designed and tested to comply with the DALI Standard EN 62386 (VO and V1), for DALI emergency lighting components. The DALI cable connecting the luminaries in a circuit must be mains rated. 2 core cable and can be 1.0mm sq to 2.5mm sq, based on the circuit length required. The DALI cables must be of full mains rated voltage, since under certain fault conditions the DALI bus can become live at the mains voltage.

Without the use of a DALI 'repeater & PSU', the circuit length is limited to 300m (using 1.5mm sq cable), and this length is doubled with use of a 'repeater & PSU'. Maximum lengths of cables permitted to be connected to the DALI network depends on the size of cable used. Refer the table given for maximum permitted length for various size of cables.

Testing Mode

The smart emergency master panel can be programmed to initiate self test at predetermined time and date, or repeat the testing at pre-determined time duration. Typically it can be programmed for weekly, monthly and quarterly testing.

For large network of light fittings, selected zones / floors can be grouped together, and testing can be conducted only in this area at a pre-determined time.

Alpha Numeric Addressing.

Each fitting can be addressed as below:
Name: There are 12 characters free for any Text Numeric or Special. Touch to bring up the Keypad for typing.

Location: There are 16 characters free for any Text Numeric or Special.

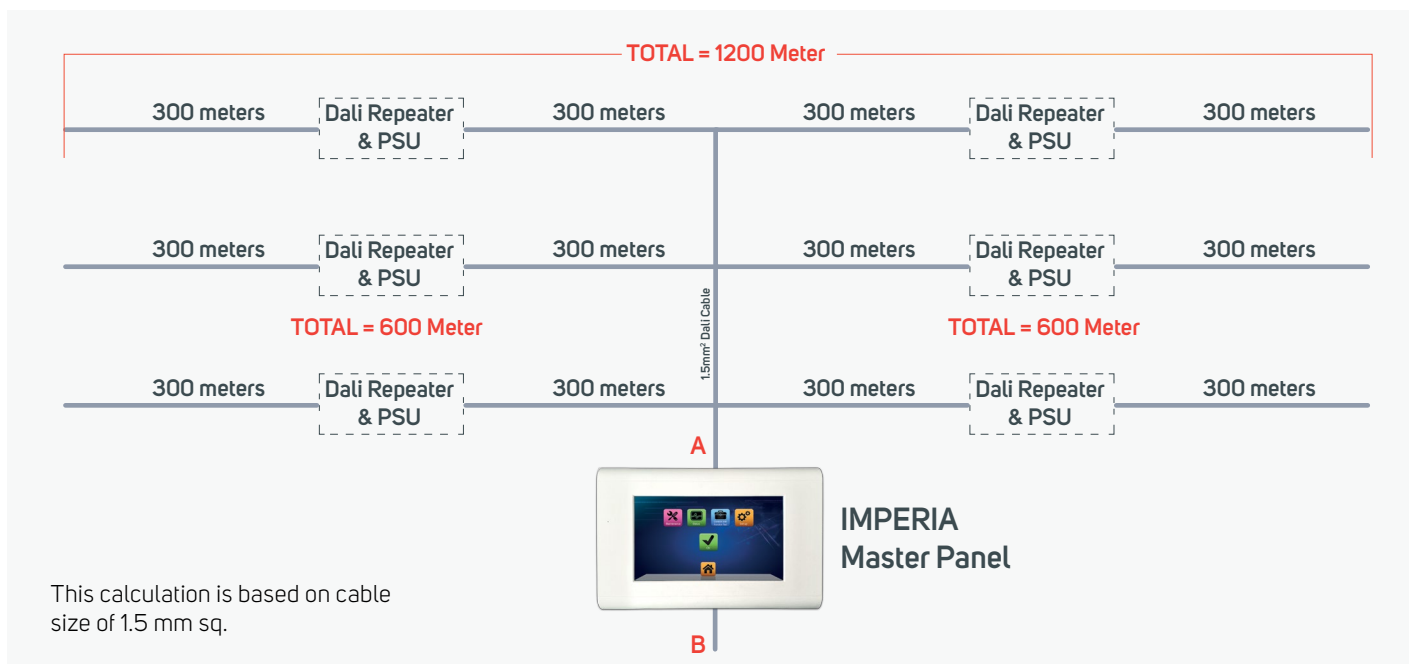

TECHNICAL DATA

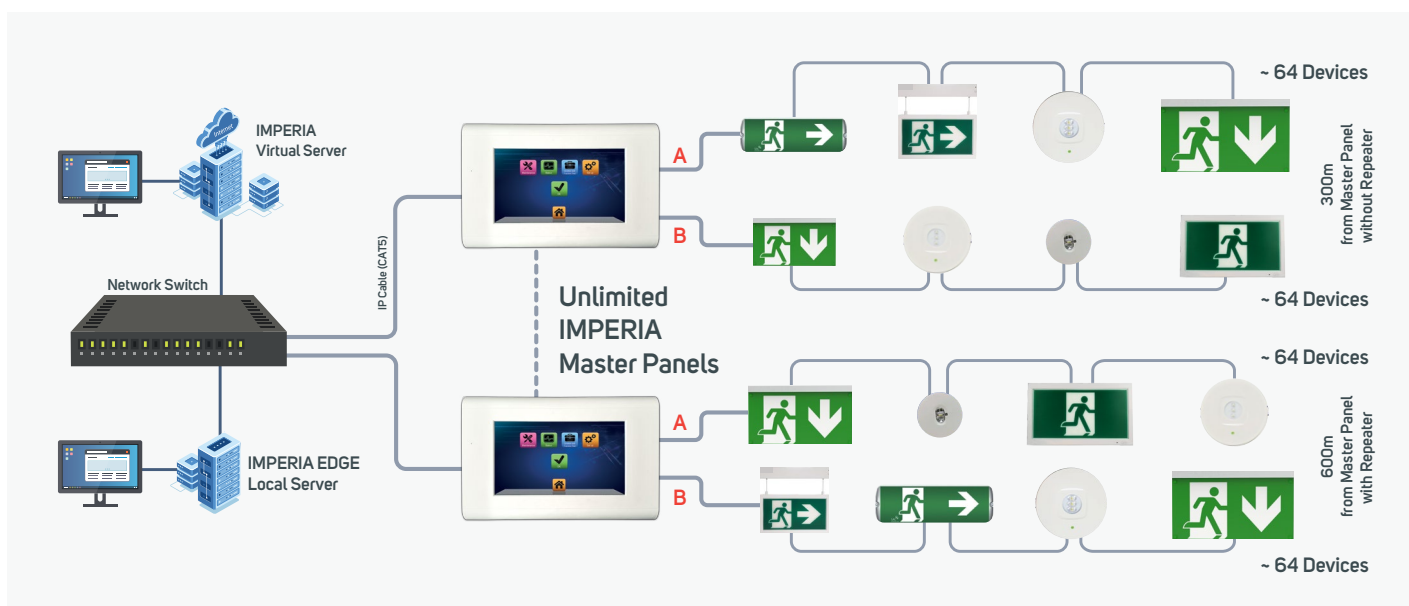

IMPERIA MASTER PANEL	
RATED VOLTAGE AND FREQUENCY:	230V @ 50/60Hz, 6.0W
TEMPERATURE RANGE:	0°C to +50°C
WEIGHT	873g without power supplies and controls
DIMENSIONS	W x H x D: 213mmx150mmx35mm (including Surface mount housing Cutout Size: 198mm x 117mm)
PROTECTION RATING:	IP20 - Suitable for indoor use only
MEMORY CAPACITY	4 years of report Storage

DALI NETWORK WIRING OPTIONS

IMPERIA - DALI WIRING & NETWORKING

NOTES ON DALI WIRING

1. The maximum number of light fittings per DALI circuit (line) not to exceed 64.
2. DALI wiring topologies can be bus, star (hub & spike), tree or line wiring.
3. Ring & Mesh wiring cannot be used when using DALI protocol.
4. Each IMPERIA control unit can accommodate 2 DALI circuits, so a max of 128 light fittings per IMPERIA control unit.
5. The DALI circuit length is dependent on the size of cable used, as shown below:

- a) 1.0 mm sq cable will have a limit of 200m
- b) 1.5 mm sq cable will have a limit of 300m
- c) 2.5 mm sq cable will have a limit of 500m

6. Circuit length can be increased by using DALI repeater/ PSU (refer schematic drawings for clarification).

- a) The repeater & power supply only increases the circuit length and not the number of fittings (addresses) per circuit (Line).
- b) Use of a 'repeater/ PSU' unit doubles the DALI circuit length.
- c) Only one repeater/ PSU can be used per leg of the circuit. However additional repeater/ PSU can be used in another leg of the same circuit. (Ref schematic).

7. The DALI cables must be mains rated, capable of carrying the full mains voltage, as under certain fault conditions the DALI bus can become live at mains voltage.

8. Use of the IMPERIA EDGE server eliminates the need to have an internet connection for connecting to multiple IMPERIA controllers. Passive LAN networking connects all the controllers to a central computer.

DALI NETWORKED EMERGENCY LED LIGHT FITTINGS

MODEL: 8301-W3DH / 8301-N3DH
/ 8302-W3DH / 8302-N3DH

This range of fittings are standalone with build-in battery, and fully monitored on the DALI network, and meeting all the standards for a complete emergency lighting system.

FEATURUES

- Civil Defence approved
- Sleek LED lamps including flush and ceiling mount versions
- Suitable for anti-panic lighting with wide angle lens option
- Suitable for narrow and focused lighting with narrow lens
- Battery stand by time of 3 hrs for all fittings

Benefits

- Thermoplastic housing
- SMD LED 3030 1W, CCT 6500K
- Available for recessed mounting, and surface mounting with extra surface mounting kit
- Wide lens for open area, Narrow lens for corridor
- Can operate in non-maintained and switched maintained mode

8301-N3DH
Narrow lens for corridor

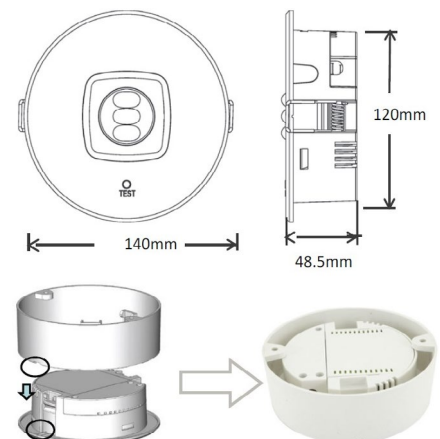

8301-W3DH
Wide lens for open area

DALI NETWORKED EMERGENCY LED LIGHT FITTINGS

MODEL: 8203-3DH / 8204-3DH / 8202-3D80H

Benefits

- Polycarbonate trim plate and die casting heat sink
- Polycarbonate housing for LED driver and battery
- Special reflector design suitable for escape pathway
- Cut out hole : \varnothing 42-50mm
- Flux:180lm **8203-3DH** 180lm,**8204-3DH** 340lm
- Can operate in non-maintained and switched maintained mode

8203-3DH

8204-3DH

8202-3D80H

FEATRUES

- Civil Defence approved
- 24 hours charge
- 220-240VAC, 50/60Hz
- Suitable for narrow and focused lighting with narrow lens
- Battery stand by time of 3 hrs for all fittings

DIMENSIONS

Cut out \varnothing 42- \varnothing 50

DALI Networked LED EXIT Lights

MODEL: 9110-3DH / 9111-3DH / 9105-3DH / 9112-3DH

FEATRUES

- Sleek, decorative and attractive design
- Wide range of size to suit user applications
- Extremely low power consumption
- Single and double face exit sign in the range
- All mounting type options available
- Viewing range of fittings suitable for all types of application
- Has all relevant 3rd party approvals .

This range covers DALI monitored LED exit signs are specifically designed for hotels and large shopping mall, where in addition to the artistic & sleek design, it has to meet all requirements for 3rd party approval / Civil Defence approval. As viewing distance for exit signs are directly calculated on size of luminaires, we have the complete size range of fittings, suitable for high installations and also for long corridors.

With DALI open protocol being used for monitoring, maintained and non-maintained fittings are on the same monitoring circuit, and upto 64 fittings can be connected on a single circuit, and with networking of the smart control unit, unlimited fittings are monitored and status documented on a central control PC.

Benefits

- Flexibility in design and applications
- Wall and ceiling mounting
- Suspension mount available with Max.1 Meter suspension wires
- Quick connection and easy installation

DALI Networked LED EXIT Lights

MODEL: 9420-3DL / 9430-3DL / 9440-3DL / 9450-3DL

Benefits

- Various viewing distances for different applications (20M,30M,40M,50M)
- Wall, ceiling & surface mounting
- DALI interface with NFC function
- Smart Wireless system available
- Replaceable LiFePO4 Lithium Battery provides improved energy consumption

Self Contained LED Emergency Lights

MODEL: 8202 / 8203-AH / 8203-MH/ 8204-3AH

Self contained LED emergency lights with built-in battery, control and switching units. This type of emergency lights have option to work on 'maintained' or 'non-maintained' mode. Some models also come with the 'Switched maintained mode' of operation. All models are robust, cost effective and having 3rd party approvals.

FEATRUES

- Option for manual testing or auto test.
- Have 3rd party approval for stand alone operation
- Robust and cost effective
- Low power consumption
- 3 hrs and 1 hr battery stand-by time option
- Recharge time for fully discharged battery not exceeding 24 hrs
- Flush ceiling, wall & ceiling surface mount options
- Range suitable for anti-panic with wide angle lens and narrow angle lens for corridors

Benefits

- Polycarbonate trim plate and die casting aluminum heat sink
- Polycarbonate housing for LED driver and battery
- Special reflector design suitable for escape pathway

94XX SERIES

Self Contained LED EXIT Lights

MODEL: 9105-1MH /9108-1MH /9109-3MH
/9110-1MH /9111-1MH /9112-1MH /9420-1AL

Standalone, self contained LED exit lights with build-in battery and all control, switching and testing facility with international 3rd party approvals. A wide range of LED exit light models for all types of installations, including wall, ceiling, & semi flush types. Various sizes of exit signs can be selected for long range and high ceiling installations.

FEATRUES

- All LED fittings are consuming extremely low power, and hence very cost effective.
- Sleek design blends with even the most modern architecture.
- Fully standalone with built-in battery
- Testing options of auto test and manual test
- Various battery models available with each fittings
- Battery capacity can be appropriately selected to suit the discharge time required.

Benefits

- Flexibility in design and applications
- Wall and ceiling mounting
- Suspension mount available with Max.1 Meter suspension wires
- Quick connection and easy installation
- Various viewing distances for different applications (20M,30M,40M,50M)
- Wall, ceiling & surface mounting
- Replaceable LiFePO4 Lithium Battery provides improved energy consumptio
